## **Trinity Consultants Partners with Canadian-based Engconsult Limited**

**Research Triangle Park, NC** (February 12, 2003)? Trinity Consultants, a firm that assists industrial facilities with regulatory compliance and environmental management issues, announces a partnership with Toronto, Canada-based Engconsult Limited to localize and market *BREEZE*<sup>®</sup> software in Canada. Engconsult will market, sell, and handle customer support for *BREEZE AIR* for continuous industrial releases, *BREEZE HAZ* for accidental releases, and *BREEZE* Explosive Safety models.

Engconsult is a civil engineering company specializing in finite element analysis, air quality management, transportation planning, clean development mechanism, climate change, and information technology. Since 2001, Engconsult Limited has collaborated with other companies to bring U.S.-based high-tech software and specialized training programs to Canada.

“We are excited about bringing *BREEZE* software to the Canadian market through a local distributor,” said Tom Grosch, Manager, Software and Data Services for Trinity Consultants. “Although we already have a strong client base in Canada, we anticipate a local distributor will prove to have significant advantages for our clients.”

Dr. Masud Karim, President of Engconsult Limited, agreed. “*BREEZE* software has the potential to thrive in the Canadian market as a result of provincial regulation to switch to U.S. EPA’s AERMOD and ISC models. We are excited about this partnership and the opportunity to work directly with Trinity Consultants.”

Trinity can be reached through its Web site at [breeze-software.com](http://breeze-software.com), by calling (919) 549-0499, or by e-mailing [breeze@trinityconsultants.com](mailto:breeze@trinityconsultants.com). Engconsult Limited can be reached through its Web site at [www.eng-consult.com](http://www.eng-consult.com), by calling (905) 455-7892, or by e-mailing [info@eng-consult.com](mailto:info@eng-consult.com).
