Engconsult signs a Contract with Dainichi Consultant Japan for an Asian Development Bank (ADB) project in Indonesia April 11, 2005

Engconsult Ltd., Canada signed a contract with Dainichi Consultant Japan for a technical assistance (TA) project of Asian Development Bank on April 11, 2005 for *Urban Air Quality Improvement Sector Development Project* in Indonesia.

The purpose of the TA is to assist the Government in the preparation of the Urban Air Quality Improvement Sector Development Program, in terms of: (a) reviewing policy and regulatory framework, (b) improving implementation strategies, and (c) strengthening institutional capacity and infrastructure required for regulatory enforcement in the Program.

Engconsult is responsible for:

- Identifying policy/strategy to be implemented by the government in 5 years on air quality monitoring,
- Assess the condition of existing monitoring equipment and develop investment component for each implementation agency for the rehabilitation of current air quality monitoring/data management system,
- Assess the requirement of purchase of additional air quality monitoring equipment and stationary source emission testing equipment,
- Identifying investment items for air quality monitoring devices that will be needed by the private sectors to reduce air emissions.
- Perform dispersion and receptor modeling to see whether air monitoring could be supplemented in some extent by advance modeling work.
- Conduct training workshop on technical design of air pollution management activities including air quality monitoring.
- Prepare inception, interim and final reports by providing specific inputs related to air quality monitoring.
